

CHALIMBANA UNIVERISTY

STUDENT #: 2105132666

ASSINGMENT: Design an Entity Relationship Database

HAND IN DATE: August 20, 2021

Entity Relationship Diagram (ER Diagram)

The diagram below represents a Many to One Relationship –
This is where there are many students who have attributes such as (i) ID, (ii) Name and (iii) Student ID.
They are learning one subject from 1 Lecturer who also happens to have ID, Lectured ID and Name.
In this regard, the relationship between the Students and the Lecture is the subject the lecturer is tutoring to the students.
